EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the Specification:

At the beginning of the page 1, add --This is a continuation of application Ser. No. 09/050,680, filed Mar. 30, 1998, now U.S. Pat. No. 6,243,584.--.

In the Claims:

Cancel claims 2-6, 8, 10-12, 14-18, and 20.

Terminal Disclaimer

3. The terminal disclaimer filed on 06/30/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,243,584 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

4. The examiner's amendment is used to cancel claims 2-6, 8, 10-12, 14-18, and 20 as indicated on page 2 of the Communication received on 06/22/00. Those claims had

Art Unit: 2685

not been canceled since they were not included in the Amendment section. In addition, the continuation data is added in the specification. The examiner's amendment is needed in order to put the case in condition for allowance.

5. Claims 1, 7, 9, 13, 19, and 21-26 are allowed over the cited prior art.

6. The following is an examiner's statement of reasons for allowance:

Applicant has filed the Terminal Disclaimer to over come the double patenting rejection in the previous Office action mailed 03/30/04; therefore, claims 1, 7, 9, 13, 19, and 21-26 are now allowable over the cited prior art.

Regarding the independent claims 1, 7, 13, 19, and 21-26, the cited prior art fails to teach the method, system, and computer program product for increasing capacity of a wireless network having a plurality of cells sites comprising the steps of determining signal quality parameters associated with at least one cell site of the plurality of cell sites and modifying the pool of available frequencies for assignment based on the determining signal quality parameters associated with the at least one cell site in addition to the steps of defining the pool of available frequencies and assigning the pool of available frequencies to limit neighboring cell sites assigned a same frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

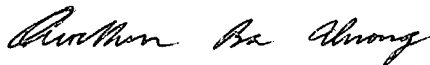

Art Unit: 2685
